Art Unit: 3747

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 6, 9, and 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klinger in view of Djordjevic.

Klinger teaches the use of two pumps on the same shaft and used to feed a fuel rail. One of the pumps can be disabled in order to reduce the number of pump strokes per rotation of the shaft thereby resulting in the correct fuel pressure in the rail. The two pumps are controlled by separate magnetic spill valves (4).

Djordjevic teaches a radial pump having three pump pistons which is the type of pump used by the applicant. The pump piston output is varied by the use of a single spill valve for all of the pistons. This valve spills fuel back to the low-pressure source of the pumps. The exact way the pumps are controlled is not disclosed, but the control is disclosed as varying with engine parameters.

It would have been obvious to use the pump piston and spill valve arrangement of Djordjevic in the Klinger system since both systems were feeding similar high-pressure injection engines.

Claims 3-5, 7-8, 10-11 and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3747

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's arguments filed 5/14/07 have been fully considered but they are not persuasive. In particular, the rejection under 35 USC 112 has been overcome, but the discovery of new art applicable to the claims has required the use of a new non-final rejection of the pending claims.
